It is also highly recommended for undergraduate medical students. ' This book combines a primer for the novice with advanced reasoning for the expert, both readerships being led through a range of very authentic case studies. The novice can look up the basic elements of current law, or acquire some rules of thumb about assessment of capacity or quality of life. The expert can think about clinical scenarios where there are no right answers, and all is contingent, or work out how the loss of the privilege of driving might be reframed to maximise mobility. Every practitioner should have this book, and it should be well-thumbed.' From the Foreword by Professor Steve Iliffe.
